EDUCATION

Peking University

M.Sc. Computer Science, Artificial Intelligence Specialization

Sep. 2026 – Expected July 2029

Beijing, China

University of Alberta

B.Sc. Software Engineering Co-op

Sep. 2021 – May 2026

Edmonton, AB, Canada

EXPERIENCE

Research Intern

Sichuan University Qingdao Research Academy

Oct. 2025 – Dec. 2025

Qingdao, Shandong, China

- Research on effectiveness and efficiency of applying reinforcement learning in long context language models
- Participated in experiments optimizing the accuracy of deep learning human pose, hand, and face identifiers
- Developed a medical examination web app **Medichek** for topical medication tracking with **MediaPipe**

Software Project Manager Co-op

SINOSEAL

May. 2025 – Aug. 2025

Chengdu, Sichuan, China

- Implemented a locally-deployed agentic LLM **iSeal** for internal use to aid in information and process management
- Utilized **Docker Compose**, **RagFlowPlus**, **ElasticSearch**, and **Qwen3** on the Huawei Atlas 800i A2 inference server
- Coordinated contractors and employees to complete project phases upholding deadlines and quality standards
- Integrated a multifaceted, scalable, international management approach to future company project development

Software Automation Test Engineer Co-op

Lumentum

Jan. 2024 – Aug. 2024

Ottawa, ON, Canada

- Developed optical test automation and QA software in **C#** and **VB.NET** with a team of 6 engineers
- Reduced optical power meter response time by 2 orders of magnitude from 50 milliseconds to 50 microseconds
- Improved response time of GPIO and SPI devices by **71.4%** via device driver optimization

Drive Systems Team Lead

Space Exploration Alberta Robotics

Sep. 2023 – Jan. 2024

Edmonton, AB, Canada

- Led a team of 4 engineers to develop a rover drive system in Python integrating MoveIt and NAV2 frameworks
- Implemented Ackerman steering algorithms and improved crash avoidance/detection to reduce crashes by 30%
- Ensured rover met the safety standards as per the University Rover Challenge (URC) and the Canadian International Rover Challenge (CIRC) requirements and guidelines

PROJECTS

WebHunt | React, TypeScript, JavaScript, Express.js, Node.js, socket.io, Passport, MongoDB

Mar. 2025

- Developed **TypeScript**-based WordHunt web game with **React**, **Node.js**, **Express**, and **MongoDB**
- Implemented real-time synchronized multiplayer gameplay functionality using **socket.io** up to 16 players
- Integrated Google authentication with **Passport** and user statistics tracking to enhance user engagement

mitosu! | Tensorflow, Python, MongoDB, React, JavaScript, Express.js, Node.js

Mar. 2025 – May. 2025

- Created song recommendation system in **Python** for the popular rhythm game osu! using **Tensorflow**
- Built secure REST API for user data using **Express.js**, **Node.js**, **MongoDB**, and **React**
- Applied Bayesian Personalized Ranking using matrix factorization optimized with stochastic gradient descent

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript/TypeScript, HTML/CSS, C#, VB.NET, SQL, Rust

Libs/Frameworks: React, Node.js, Express.js, TensorFlow, Keras, SKLearn, Elastic, Pandas, NumPy, Matplotlib, JUnit

Developer Tools: Git, Docker, AWS, Android Studio, MongoDB, Visual Studio, PyCharm, Google Cloud

Miscellaneous: REST, Atlassian, Data Structures & Algorithms, Relational and Vector Databases, Embeddings, Agile

Open to relocation. References provided upon request.
